

TESTPOINT VOLTAGES

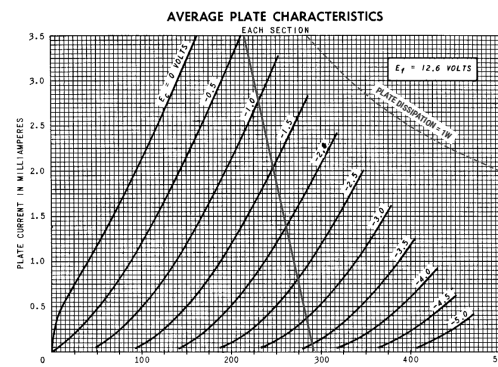

Voltages were measured with a maximum 32mA cathode current in the output tubes.

testpoints	V1A	V2A	V2B
plate	165.2	207	200
cathode	1.04	0.354	0.561
grid	0	-24m	-13.5m

NOTE 1

All ceramic caps in this stage were replaced by silver mica or film/foil orange drop types.

NOTE 2

Move LOAD LINES horizontally to match 0mA plate current with measured PRE voltage.

CAUTION

NEVER EXIT STANDBY WITH THE TUBES REMOVED!
